Today's Thought

God sent the birds and sunshine
To gladden all the world;
He sent the foliage and flowers
In radiance unfurled;
He sent the June, the stars, the
moon,
The pearly dew drops sweet;
And then he sent you, Mother
dear,
To make it all complete.

Wanted Youths Arrested at Crossfield For Bowden Theft

Town Constable Belshaw arrested Lloyd Adams and Jim Anderson, of no fixed address, near the Highway Service Station Monday in connection with a theft of clothes and other articles at Bowden.

Monday morning, May 4th, G. Kohuta, employed by the C.P.R. at Bowden, discovered that his Dunning Bag containing 6 or 7 shirts, 2 or 3 pair of pants, razors and various other articles was missing from his cabin.

A search failed to reveal the whereabouts. Being suspicious of two young lads who had been hanging around the place, commenced a hunt for them; only to find that they had pulled out on a southbound freight.

Getting the agent at Bowden to wire down the line, Agent Fleming, called Constable Belshaw, and on the arrival of the train here, a search was instituted; but no one on board had any of the missing apparel. One of the train crew, on learning of the reason for the train search, volunteered the information that two men had got off the train and were now over at the highway trying to thumb a ride to Calgary.

Upon investigation, Constable Belshaw picked up Adams and Anderson, and found some of the stolen goods in their possession, it later transpiring, they had discarded part of the goods by flinging them off the train on the journey South.

Lodging them in the cooler, Jim got in touch with police authorities at Olds, and they arrived in the evening, and took possession of the two men.

Harold Mair, Frank Murdoch In Auto Accident

Driving to the north farm on Sunday, Frank Murdoch and Harold Mair were involved in what might have been a very serious accident. As it was they received some very painful bruises and cuts besides getting badly knocked about.

The boys were driving an old Ford, when the radius rods buckled, capsizing the car in a ditch, and flinging the occupants out.

It was indeed fortunate that nothing worse befell them other than cuts and bruises.

Frank has some bad markings on his face while Harold has a badly bruised side.

Census Enumerators Receiving Instructions

Mr. J. C. Herron, census commissioner for the Federal constituency of Bow River, was in town on Wednesday instructing his aides in the fine arts of tabulating the answers to the many questions asked by the Census Department of the Dominion of Canada.

To Our Mothers

Deep within the heart of me there's a secret shrine
It is more than part of me something sweet divine,
It was sent for me to love while I journey through,
Just a blessing from above Mother Mine its YOU.
All I am or ought to be Mother Mine you taught to me
When you held me on your knee Mother Mine
With your tender love divine, nothing I can say or do
Could repay what you've gone through
I would yield my life for you Mother Mine,
How I love you Mother Mine.

—(Jassman Shay)

On Mother's Day let us give thanks
for the one great gift exceeding every other
The love of our dear Mother.

A Day's Thrills

How many times have you, a motorist, thought over your experiences in a single day's driving?

Some single incident may stand out in your mind, but if these were grouped, the impression might be rather startling.

All of which draws attention to the big percentage of highway hazards and the need of campaigns for safe driving to cut the death toll, reduce injuries to persons and damage to property.

At a recent safety conference, one of the speakers told the following story of a single day's experience while motoring:

"I was on my way home from a neighboring town the other day when I saw a rather ancient car in the distance coming toward me. All at once it turned over in the ditch," he said.

"I rushed over and three little children, a boy and two little girls, were crawling from under the car. None was hurt. In the car also was an old lady, about 80, and she was not hurt, but there were two other women, who were bleeding profusely from minor cuts. I imagine they were riding in the front seat and were thrown against the windshield.

"That experience slowed me down about 10 miles an hour when I resumed my journey home.

"A little farther on a cream colored car whizzed by at a high rate of speed. As I watched it speed ahead it seemed, all at once, to become a great black funnel of smoke. I saw the man run out toward the edge of the road, I was scared and I approached the car cautiously, to see where the fire might have originated. It was pretty nearly burned up before the fire was extinguished.

"Well, that experience slowed me up another 5 or 10 miles an hour. It was getting dusk when I saw a car approaching. It looked as if it were going about 100 miles an hour. Just as it got within 100 yards of me, one of the front tires blew out, and I saw the rubber fly. Apparently the driver had strength enough to hold the car. If he had not, it might have killed both of us. Well, by that time, I had slowed down so much that I was barely moving.

"I approached a bridge and saw another car nearing me. It was coming at a high rate of speed, and as I got nearer the bridge I stopped to let him get across. Just as he reached the bridge a cow crossed the road. The car hit the cow, turned over four times and landed on its wheels. And believe it or not, he didn't even stop, but whizzed past me, doing 75."

All this happened in one day. And these things are going to happen until we get the demon out of man.

—Voice of Motordom.

Hardwood for Repairs

We carry in stock at all times a complete line of Oak, suitable for wagon and implement repairs.

Get your Reaches, Eveners, Singletrees, etc, from US—WE can fix you up with almost everything in this line.

Where an inexpensive job is desired, better try our Birch—it is tough and strong, and will give good service.

Village Council Monthly Meeting

The usual monthly meeting of the Council was held in the Town Hall Monday evening, May 4th, all Councillors present.

Many matters were discussed and passed, chief amongst them being, "The Weekly Half Holiday, Business Taxes, and Village Welfare.

It was passed and agreed that the Village Bye-Law as it now stands; with regard to weekly half holidays, would remain and that the Council would see that it was rigidly enforced. Offenders being dealt with severely.

The bye-law reads in part:

From March 1st, 1936, the stores shall be kept open until May 15th, 1936, when they shall again be closed until August 15th. Provided of course in the event of a Public Holiday occurring in any week the provisions of this bye-law shall not apply and store or shop may remain open their usual hours

Italian Troops Enter Addis Ababa

Continental Press Dispatches announced that Italy raised her flag over Addis Ababa, the capital of Ethiopia, today, May 5th, ending the seven month campaign of conquest, which has left the Ethiopian empire a disorganized ruin.

News of the fall of Addis Ababa filled to overflowing the cup of rejoicing which Marshal Badoglio's armed victories brought to Italy.

"Italy," said Mussolini addressing a vast throng, "has lived many memorable hours until that of today, which certainly is one of the most solemn."

Great Britain has asked Italy to begin to discuss peace at once.

Buyers Must Get Receipts

Purchasers must obtain a receipt giving all particulars of a sale at the time of paying a tax to vendors under the Ultimate Purchasers Tax which went into effect May 1, E. M. Gunderson, acting superintendent in charge of Sales Tax enforcement, declared at Edmonton Monday.

Mr. Gunderson, who clarified a number of points concerning collection, said the receipt requirement had been overlooked in some quarters, vendors merely dropping the amount of the tax into a special box or marking it on a special tally-sheet and issuing no receipt to identify the amount.

"The receipt need not be in any particular form but should show the name and address of the vendor, a statement identifying the commodity or commodities purchased, the date of sale, the price of each commodity and the amount of tax paid by the purchaser," Mr. Gunderson stated.

He pointed out also that where a contract had been entered into for the purchase of a commodity prior to May 1 and the commodity had not been delivered until after May 1, the purchaser must pay the tax on the balance of the purchase price unpaid on May 1.

The Burden Of Debt

Figures revealing the enormous burden of debt under which the people of Canada are staggering have recently been published in the first of a series of articles by Major J. Greetham de Lorimer in the Montreal Daily Star.

The article is prefaced by the announcement that the author is a recognized statistician with an international reputation, that his work has been officially recognized both in Great Britain and the United States and that the information he reveals throws "a new and alarming light on the whole Canadian debt situation."

Major de Lorimer then proceeds to hurl figures at his readers showing at the outset that, exclusive of private capital invested in domestic enterprises such as farms, homes and other small estate property, the people and industries of this country are indebted to investors in a total of \$18,225,244,923, covering bonded indebtedness of Dominion, provincial and municipal authorities, schools, investments in railroads, electric tramways, electric stations, telephone companies, all manufacturing concerns, mines and metal industries, forestry and fisheries industries, public utilities, trading establishments, finance, insurance, land and mortgage companies.

The writer states that of this total securities for \$9,202,820,361 are held by foreign investors or 51.04 per cent and the remaining \$9,022,424,562 or 48.92 per cent represents investment by Canadians.

Dividing the total in another manner Major de Lorimer shows that of this grand total \$11,457,696,492 or 62.70 per cent is "dead weight" debt or indebtedness on which principal and interest must be paid out of public taxation.

Further analysis of several tables of figures scattered through Major de Lorimer's article show that the total bonded debt chargeable to the people of the three prairie provinces is \$1,470,850,067 of which \$915,648,966 represents dead weight debt for which payment must be made out of public taxation levied on the people of these three provinces.

Allocating these debts to the three individual provinces, every man, woman and child in Manitoba is pledged in a total of \$871.69 or for dead-weight debt, \$533.16. Saskatchewan's per capita share of total debt is \$486.66 or \$205.41 for dead weight debt and every individual in Alberta is pledged for a total debt of \$835.70 and for debt payable out of taxation \$419.55, and it must not be forgotten that these figures do not include private capital invested in small domestic enterprises. Multiply these figures by four and a fraction and the indebtedness of the average family is revealed, if Major de Lorimer's figures are unimpeachable.

Major de Lorimer lays the blame for this condition of affairs at the doors of the Federal and provincial governments as well as the municipalities and school authorities of each province, stating that this huge burden is attributable to over-borrowing and not to Canada's participation in the Great War.

There can be no gainsaying the implied corollary that Canada is over-governed when it is remembered that a population of 10,376,786 people (1931 census) must pay for the privilege of a Dominion House of Commons consisting of 24 representatives and nine provincial legislatures consisting of another 509 legislators. It is not alone the cost of upkeep of so many legislative institutions which has plunged the people into such heavy indebtedness but the expenditures which so many representatives have been expected to authorize to ensure a place in the sun for their respective constituencies.

That this country has more government than the population warrants can be understood when it is pointed out that there is a representative in the Canadian House of Commons for every 42,354 persons as compared with one for every 74,909 of population in the British House of Commons and when to this is added representation in the provincial legislatures averaging one for every 113,762 of population, the expense of government is altogether disproportionate to the population and its ability to pay.

To cope with this situation various remedies have been broached from time to time including proposals to reduce the number of legislatures to five, one for the maritimes, one each for Ontario and Quebec, one for the prairie provinces and one for British Columbia. Another is a reduction in the status of the provincial legislatures to that of the county councils of England, which unlike the legislatures are not sovereign bodies and are limited in scope and authority.

With the western provinces in financial difficulties some of these proposals are likely to be at least discussed in the near future, even if they are not the solution to the problem.

The Farming Profession

The agricultural institutions of learning have changed all this. Farming has been elevated to the rank of a science, and weather conditions permitting, they know just what to expect and mostly get it. Agriculture has become as technical a business as mechanics, and because of this fact it is becoming a highly specialized profession.—Chatham News.

Appear Fond Of Ink

Rats have been drinking black ink at night in Uswelendun, South Africa, city hall. Possibly there were blondes who wish to become brunettes, is one suggestion. P. Heyns, the municipal foreman, says he frequently has found his ink well, which he kept in a locked room, empty. Before leaving the office one afternoon he poured the ink into a saucer. Next morning it was empty.

Great Britain has decided to continue use of its 20,000 bicycles for delivery of special delivery letters, but will also add a large number of motorcycles. 2149

Story Of Mummy Case

English Actor Linked Ocean Tragedy With Egyptian Curse

Twenty-four years ago, early on the morning of April 15, 1912, the great new steamship, the Titanic, on her maiden voyage, foundered in mid-Atlantic, after striking an iceberg, with a loss of 1,500 lives.

What mysterious forces of Fate brought about the disaster?

Tom Terriss, the celebrated English actor, on an American broadcast some time ago, linked the ocean tragedy with the black magic of an Egyptian mummy case.

Warned by a palmist not to buy, while in Egypt, a mummy case, he was much tempted when one was offered to him for £100, but he refused to buy it. But next day the dealer came to his hotel and when he cut the price to £50 Terriss decided to defy superstition. He shipped it to Alexandria, to await his return from big game hunting up country. The first day out, his gun exploded and he lost an eye and his one arm badly injured. Homeward bound to England, a friend travelling with him died suddenly and another who had been with them jumped overboard.

In London he offered the case to another collector. That night he received a phone call that the collector had been found dead in front of the case, a revolver in his hand. The case was then sent to the British Museum, where a photographer took a picture of the case, but when he was developing the film it took fire. An artist painted a picture of the case and on leaving with it was knocked down by a team of horses and the painting was destroyed.

Finally, the British Museum offered the case to the Metropolitan Museum in New York. It was accepted and shipped.

The mummy case went down with the Titanic!

Gold From Platinum

Modern Transmutation Is Described By University Men

A method of turning platinum into gold—somehow the reverse of the ancient alchemist's dream of forming a baser metal to the precious yellow—was described to the National Academy of Science.

One of science's newest assaults against the structure of the atom is involved in the modern transmutation described by two men from the University of California.

Dr. E. O. Lawrence and Dr. J. M. Cork performed the experiment with the cyclotron, or whirling machine gun in which the nuclei of atoms are whirled about by an electric field to attain energies up to 11,000,000 volts and then shot at the atoms of other elements.

Dr. Lawrence described how a beam of these atomic nuclei of deuterium or heavy water with energies of 5,000,000 volts had been shot through a number of foils or thin sheets of platinum.

The platinum atoms apparently captured some of the speeding particles and added them to their own masses to change themselves into the next lower elements in the table which is gold, he said.

Feel Canada Is Home

Large Number Of British Born Prefer Living In Dominion

Prof. Stephen Leacock, well-known writer, in response to the suggestion of a London paper that now his duties as Professor at McGill were over he might return to his native land, England, replied in part, "No, I don't think I can leave this country. There is something in its distances, and its isolation and its climate that appeals for ever. Thank you, Mother England! I don't think I'll come home. I'm home now." In this expression he is voicing the feeling of a large number of British born who have made this Dominion their place of residence.—Brantford Express.

More than \$5,000,000 will be spent this year on new roads in the Transvaal of South Africa.

The King's Birthday

Commercial Communities Not Obligated To Observe It As Holiday

No special proclamation will be required to make the birthday of King Edward VIII., occurring on June 23, a public holiday. In several statutes it is set forth that the birthday of the reigning sovereign shall always be a public holiday. This means that it will be a holiday in the Government service, the banking institutions, the schools and municipal offices. To what extent it will be observed by the commercial community will be for them to decide.

June 3, the birthday of King George V., goes off the calendar as a holiday. It was never observed as generally as other national holidays, largely because it occurred so soon after the Victoria Day holiday on May 24. Something of the same difficulty may be experienced from the fact that the new King's birthday on June 23 will be a week before July 1, which has perhaps the most general observance of all Canadian holidays.

Post Office Revenue

Operating Profit Of \$3,000,000 For Year Ending In March

The post office department had an operating profit of \$3,000,000 in the year ending in March, Postmaster-General Elliott reported to the House of Commons. Net revenue totalled \$32,507,400.

The post office department is charged with nothing for its buildings which are erected by the public works department. The postmaster-general, replying to A. A. Heaps (C.C.F., Winnipeg North) agreed it looked anomalous for his department to be charged nothing for rent, repairs or caretaking. At the same time, the practice had been followed since confederation and he agreed one department should do all the building. Perhaps some system of rentals could be worked out but it might be difficult.

"It is a question for parliament to decide," added Mr. Elliott.

Awarded Scholarships

Thirty Students Of Canadian Universities Encouraged By Research Council

Thirty students representing 13 Canadian universities have been awarded postgraduate scholarships for the year 1936-37 by the national research council. It was announced at Ottawa. The awards include two fellowships worth \$700 each, 11 studentships at \$600 each and 17 bursaries at \$500 each.

The object of these awards, the council hopes it will lead to a "more profitable utilization of Canadian raw materials and the expansion of markets for Canadian products."

Has Been Invaluable

Aviation Playing Great Part In Opening Up Northwest

Planes have opened up the northwest to an amazing degree, Right Rev. A. H. Sovereign, Church of England Bishop of Athabasca, said in an interview at Toronto. Bishop Sovereign spoke of the outstanding work of pilots such as "Wop" May and "Punch" Dickens. His Grace described Fort McMurray as "the largest commercial air base in Canada." The opening of the great mining area of Great Bear Lake and Goldfields, he said, has brought about a great influx of population.

Making Cheap Watches

Swiss Peasants Producing Them For Twenty Cents Each

A great outcry has been raised in the Swiss watchmaking industry by the appearance on the markets of watches costing only 20 cents.

Many Swiss watch-making plants have recently gone bankrupt and their plants are now being used to turn out watch parts by the million.

These pieces are adjusted by peasants in their spare time at a cost per gross less than is generally paid for assembling an average watch.

Will Continue Public Life

The King's action in appointing his sister as Grand Master of the Order of the British Empire indicates that Queen Mary will continue to take a big part in public life. When the period of Court mourning ends altogether in the autumn, it is said that His Majesty intends to do his mother shall, as far as possible, resume her former active leadership of woman's interests and social life.

WHEN Spring thaws and rains make roads impassable—when cars with ordinary tires get stuck—a set of the new Firestone Ground Grip tires will take you safely through.

These are the greatest tires ever built for traction. Note the deep, continuous bars of rubber that grip on any surface. These are so placed that they clean themselves—every bite is clean.

Ground Grip tires cost no more than ordinary tires. Get a set from your nearest Firestone Dealer NOW.

Firestone
GROUND GRIP TIRES
FOR CARS, TRUCKS AND TRACTORS

SELECTED RECIPES

SPANISH CUP CAKES

- ½ cup butter
- 2 cups powdered sugar
- 4 eggs
- ¾ cup flour
- 4 teaspoons Magic Baking Powder
- ¼ teaspoon salt
- ¾ teaspoon ground mace
- 1 cup milk

Cream butter adding sugar gradually, beat until fluffy and white. Add eggs, one at a time and beating between the addition of each. Sift flour, once, measure, add baking powder, salt and mace, then add to first mixture alternately with milk. Half fill deeply fluted or plain individual cup cake tins. Bake in 350 degrees F. oven. Turn out and when cool put on top a thin white icing, and top with a cherry, half walnut, grated coconut or a blanched almond. When cakes are cool a thin slice may be cut from top and some of the centre scooped out and filled in with sweetened and flavored whipped cream or custard cream, the top then replaced and cake iced as directed.

Subject For Debate

Whether Ticker Account Of World Series More Thrilling Than Radio

It is easily debatable whether listening to a radio account of world series baseball game is as exciting as it used to be in the old days coming over the ticker. Radio announcers do work themselves up in a feverish fury describing how the pitcher is now rubbing the back of his hand across his mouth before beginning the wind-up. Much more effective was the old pause on the ticker while the listener held his breath and then the verdict, Ball on, or Strike one—New York Times.

Gave Him A Headache

Lightning played a queer prank in Burnside School, New South Wales. Following a loud clap of thunder and a vivid flash, a "ball of fire" the size of a billiard ball darted through the open window, slid down a boy's pencil and set fire to the paper on which he was working out a sum. The boy put out the fire with his hand. He was unharmed but complained of a bad headache.

Famine In China

Reported That Millions Of Chinese Are Facing Death

A terrible famine sweeping Szechwan and North Honan provinces in China has assumed proportions of a national disaster with estimates of the number of natives dead or facing death ranging from 10,000,000 to 30,000,000.

Chinese vernacular newspapers reported some hunger-maddened victims were resorting to cannibalism and that other starving parents were selling their children to gain money for food.

While millions of Chinese are facing certain death from starvation, other millions are suffering "deficiency" disease which missionary doctors may must lead inevitably to their deaths.

Accomplishes Hard Trip

Englishwoman Has Crossed Sahara Desert Twice On Motorcycle

By crossing the Sahara Desert twice on a motorcycle, in the last 12 months, Miss Florence Benkiron of England feels that she has conquered it. She left London last year, carrying Miss Theresa Wallace in a sidecar, determined to cycle to Cape Town. They did it. In September, Miss Benkiron began a return journey alone on her machine and again was successful, reaching South Africa in February. She left the worn-out motorcycle in the desert and travelled the rest of the way home by motor bus. Miss Benkiron is believed to be the only woman to cross the Sahara alone.

Wins Award

W. Ralston, Toronto architect, was awarded the first prize of \$500 in the Dominion Housing Act design competition, Finance Minister Charles Dunning announced. Two other prizes of \$100 each went to Arthur W. Davidson, Brockville, Ont., and W. F. Williams, Nelson, B.C.

Beryllium is a metal about one-third lighter than aluminum.

Employment in Austria is greater than a year ago and is rising.

EXTEND PLAN TO PLACE SINGLE MEN ON FARMS

Ottawa.—Extension of the farm placement scheme to all provinces was forehanded in the House of Commons by Labor Minister Rogers. It has applied for three years to Manitoba, Saskatchewan and Alberta and involves single unemployed men placed on farms for the winter months.

The house passed a vote of \$1,600,000 for the scheme when the minister said he hoped to meet the provinces within the next few weeks and proposed extension of the scheme. At the present time, the Dominion pays \$5 a month to the man and the provinces pay \$5 to the farmer.

During the past winter, farm placements in Manitoba were 6,500; Saskatchewan, 6,700; and Alberta, 2,269.

Angus MacInnis (C.C.F., Vancouver-East) asked what was the use of putting unskilled people on outlying farms when skilled men on good farms could not make a decent living.

Mr. MacInnis said spending money for land settlement was pure waste. It only made it more difficult for the farmers and it was of no help to the city people. The government seemed to forget that production was a social process and under modern conditions no one could produce all his own needs.

"Why don't you suggest training these people as doctors?" asked Miss Agnes Macphail.

"Because there are enough doctors now and a lot of them can't make a living," was the reply. "A lot of doctors should go back to the land."

Miss Macphail said she became annoyed at philanthropists who always wanted to push people out of the cities and onto farms. Doctors, lawyers and manufacturers never wanted to make any new competition for themselves but were eager to create more competition in agriculture.

An investigation of the land settlement scheme, where city relief families are placed on farms, will be conducted before the next session of parliament, Minister Rogers announced.

He intended to visit settlements for first-hand knowledge and to assist him in concluding whether the scheme should be retained, expanded or abandoned.

Air Cooling System

Queen Mary First Ship To Be Air-Conditioned By Steam

New York.—The Queen Mary is the first ship in the world cooled and air-conditioned by steam.

Steam has never been used before for cooling a vessel, although it is in use on some Canadian and United States railroads. The steam cooling plant is one of three on the Queen Mary, the other two being carbon dioxide and methyl chloride cooling systems.

The Queen Mary has the largest air conditioning capacity of any vessel afloat, equal to the cooling coming from melting half a million pounds of ice daily.

Careless Driving Penalties

Bill Before Federal House Would Make Punishment Heavier

Ottawa.—A jail term of not less than 30 days on conviction the first time of driving a motor car while under the influence of alcohol or a narcotic is proposed in a bill, sponsored by T. L. Church, Conservative member of the House of Commons for Toronto-Broadview.

The bill is designed to amend the criminal code with the idea of increasing penalties for careless driving of motor cars. One section declares persons guilty of speeding, racing or cutting-in may be subject to one year's imprisonment or a \$200 fine or both.

Cut Legislature

Fewer Members In Ontario House Promised By Premier

Toronto.—Reduction in membership of the Ontario legislature before the next election was promised by Premier Hepburn.

Prior to the last election in June, 1934, the Conservative government of Premier George S. Henry reduced the number of seats from 113 to 90. Mr. Hepburn's proposed reduction may lower the number to 80 or even 75.

Veteran Lumberman Dead

Joseph Vipond West To B.C. During Yukon Gold Rush

Nanaimo, B.C.—Joseph William Vipond, retired lumberman and a crown witness in one of the most startling crimes of the Yukon gold rush, is dead here, aged 74.

Mr. Vipond was one of a party of six, including Joseph Claus, which started for the Klondike in 1898. Claus and two others fell behind and some time later Claus' companions were found slain in their tent on the Stikine River in northern British Columbia. Claus was arrested, convicted of murder and sentenced to death in Nanaimo. He maintained his innocence and died of self-administered poison on the eve of execution.

Mr. Vipond, as a member of the original party, was one of the witnesses brought back from the gold trail to testify for the crown.

In 1913, Mr. Vipond came to Vancouver Island as a clerk. After gold rush days he entered the lumbering business and while logging in 1907 made the record cut of the Pacific coast 13,500,000 feet from one claim on Cowichan Lake. He retired in 1913.

Public Works Program

New Zealand Government To Relieve Unemployment Problem

Wellington, N.Z.—The labor government is embarking on an ambitious program of public works, which it is expected will ameliorate the unemployment situation.

Minister of Public Works R. Semple announced a three-year plan, drawn up by departmental engineers and embodying the government's policy. It will be the chief avenue for the absorption of the unemployed.

Men will be employed in various projects, in the following order of preference: Road construction, river protection, airports, completion of railways, irrigation and drainage schemes, road bridges, overhead railway crossings, buildings, hydro-electric works and housing schemes.

Hydro-electric development is an outcome of the government's policy of providing cheap power for the gold mining industry in view of the recent encouragement given to the investment of outside capital. In 1935 New Zealand had an average of 38,572 unemployed.

Would Separate Departments

Use Of Commission For Soldiers' Pensions Is Suggested

Ottawa.—Complete separation of the veterans' bureau from the department of pensions and the placing of this body under an independent and voluntary national commission was urged before the house pensions committee here by Lt.-Col. G. R. Philip, of the Canadian Corps Association. At the same time, Capt. Wilfred W. Parry, for the same organization, recommended adjudication on pension matters become a function of district and county court judges.

Pensions Minister Power, who presided, declared the first of these suggestions echoed an old complaint—that as soon as a man became paid by the government he was suspected by the soldier and regarded by the veteran as an antagonist.

Bank Of Canada

Almost One-Third Of The Shares Held By Women

Ottawa.—Women hold 30,447 of the total 100,000 shares of the Bank of Canada. Finance Minister Dunning tabbed a return in the House of Commons giving the distribution of shares by occupational groups in the Bank of Canada at the end of 1935.

It revealed by far the largest block of stock is held by "housewives" who have 19,359 shares. "Ladies" have 6,899, "nurses" 1,010 and "widows" 3,179.

The return shows legislators have 17 shares, undertakers 14, newspapermen 445, soldiers 31. Under the name of "gentlemen" 7,057 shares are held.

Only One Voter

Paris.—Albert Cheny had a ballot box all to himself in the French elections. The village of Morteau, in Marne-Haute district, has only three inhabitants—Cheny, his mother and his sister. The women do not vote. Cheny is the only elector.

Cost Of Vimy Memorial

Ottawa.—Canada's national memorial on Vimy Ridge will cost in the neighborhood of \$1,290,000, Defence Minister Mackenzie told T. L. Church (Cons., Toronto-Broadview) in the House of Commons. 2149

King Fuad of Egypt (left), who died in Cairo after a long illness. Crown Prince Farouk (right), who will succeed his father to the throne.

OBJECTION HEARD TO AMENDMENT OF B. N. A. ACT

Ottawa.—The senate heard George Lynch-Staunton (Cons., Hamilton) register objection to any action of the British parliament which would give Canada the right to amend the British North America Act.

In its present parliament and in the provincial legislatures, Canada had all the power the imperial parliament could give, except that enabling the Dominion to establish itself as a sovereign state, he insisted.

Senator Lynch-Staunton said he did not concede the British parliament the authority, although it had the power, to deprive him of his birthright as a British subject. It would be "folly," said business and against the material interests of this country.

Finally, he said, it would be against Canada's future as a nation and would endanger the empire trade agreements and the preferential treatment Canada received as a member of the empire.

Second reading was given to the measure amending the customs act to bring it into line with the Canada-Japan and the Canada-United States trade agreements particularly with respect to duty valuations. The bill making changes in the administration of the Indian act went as far as second reading after the Conservative leader ironically remarked the draftsmen of the measure should be given the Victoria Cross. It was held over for amendments.

Senator Arthur C. Hardy (Lib., Brockville) pressed his inquiry if the government would give official recognition "to the fact that the year 1937 marks the 100th anniversary of the rising in Upper Canada under William Lyon Mackenzie, which with the concurrent one in Lower Canada, directly led to the establishment of responsible government in Canada." Debate is to be continued this week.

Senator Meighen, Conservative leader, said Senator Hardy wanted action taken to celebrate the rebellion led by Mackenzie because in the view of the Brockville senator that rebellion led to a chain of events resulting in establishment of responsible government in Upper Canada.

Held Office Sixteen Years

London.—Lord Queensborough has resigned from the offices of chairman of the finance committee and treasurer of the League of Nations' union, which he had held for nearly 16 years. He said he felt the league no longer was "a real League of Nations," and could not see how "at present it can function as an effective instrument for peace."

GOVERNOR-GENERAL'S SON VISITS JACK MINER
Hon. Alastair Buchan, right, youngest son of Lord and Lady Tweedmouth, helps Jack Miner tag Canada Goose at Miner's sanctuary at Kingsville. The Governor-General's son spent a couple of days with the Canadian naturalist and was greatly enthused with the wild birds.

Rumors Still Persist

That Prime Minister Baldwin Will Retire Soon

London.—Rumors persist in circles close to the government the retirement of Prime Minister Baldwin will not be long delayed.

"When I retire it will be at my own time," was Mr. Baldwin's own reply to rumors to this effect at Worcester three weeks ago.

S. F. Markham, National Labor member of parliament, declared the prime minister had made up his mind to resign and was only awaiting an opportunity.

Markham said: "I do not say the retirement will be in the next few weeks but one thing of which I am certain is the government before this time next year will be changed out of all recognition."

Markham added the "best man" as successor to Mr. Baldwin would be Neville Chamberlain, chancellor of the exchequer.

Such an opinion is shared fairly generally among political gossip. The Spectator suggests Mr. Baldwin will resign after the coronation of the King in May, 1937.

Alpine Maneuvres

Many Rumors and Counter-Charges In Europe

Geneva.—Austrian troops were engaged in Alpine manoeuvres not far from the German border, but the war office at Vienna insisted they were routine.

The German press charged rumors that German troops were concentrated near the Austrian border were French propaganda aimed at influencing British opinion against Germany.

French officials claimed the rumors were attempts to influence the League of Nations on the Ethiopian question, while other French sources charged the "scare" was British propaganda to influence Italy. British quarters in Paris countered the rumors were French propaganda to convince Britain she must lift sanctions against Italy if Austria's independence is to be preserved by Italy's army.

Officials said four infantry battalions, two artillery battalions and one motorized car unit were engaged in the Alpine manoeuvres. A total of 1,450 men were said to be participating.

A WIDER RADIO NEWS BULLETIN SERVICE OFFERED

Toronto.—Proposal for establishment of a Canadian Press radio news bulletin service through the day was unanimously approved at the annual meeting of members of the Canadian Press.

The meeting approved the memorandum presented by its president, W. B. Preston of the Brantford Exportor, and a delegation of directors who appeared April 7 last before the parliamentary committee investigating radio under the chairmanship of A. L. Beaulieu. The memorandum proposes to supplement with three day-time bulletins the 10-minute summary of the day's news now broadcast each evening over the network of the Canadian Radio Broadcasting Commission.

The supplementary bulletins will be prepared at the head office of the Canadian Press in Toronto free of charge and delivered through the co-operation of the land telegraph companies at a small transmission cost to any Canadian radio station wishing the service. The bulletins must not be used with any sponsored program.

Members affirmed the stand of the board of directors that in the national interest an accurate and unbiased day-and-night service of news on the air be made available to the Canadian public as an alternative to foreign broadcasts.

The meeting welcomed the assurance of the president that the parliamentary radio committee received sympathetic protection of the Canadian Press and its members against theft of their news by radio stations.

Approval was given proposals of the general manager for improvement of the news service, particularly by widening the scope of British news direct from the London office of the Canadian Press.

A resolution expressing sorrow at the death of Harry W. Anderson was passed by a standing vote. Mr. Anderson, a director representing the Toronto Globe, was referred to as one of the most esteemed and loved of Canadian newspapermen.

RELIEF BILL AND BLANK CHEQUES UNDER REVIEW

Ottawa.—The senate gave second reading to the unemployment relief bill and sent it to the banking and commerce committee for further consideration.

The limitation of parliamentary vote was contained in the unemployment relief bill as was the case in former years, Senator Arthur Meighen, Conservative leader, said, following a review of provisions of the measure by Senator Raoul Dandurand. In effect, the government was saying it was ready to give a "blank cheque" for relief but was not ready to give a "blank cheque" for peace, order and good government, which latter provisions were not in the measure.

"All this talk against blank cheque legislation is now exploded as bumbling and insincerity," he declared.

Practical steps should be taken by the government to better unemployment conditions, Senator Meighen said. The government had gotten as far in the study of unemployment relief problem "as they have in Alberta on another subject."

Senator Dandurand declared that when the government had come into office it had taken immediate steps to face the problem. The present government had promised to apply its best efforts to solve the question, and had not promised to "end unemployment" as the former Conservative administration had done in 1930. Not only were these steps proposed in conjunction with the provinces but also through the instrumentality of industrial agencies employing labor. The government was doing its level best to improve conditions. An unemployment commission of seven was being set up under another bill to deal with the problem.

When a \$200,000 of \$2,200,000 was being considered in the House of Commons for relief projects in conjunction with the provinces, Labor Minister Rogers said he could not give details because agreements with provinces had not been negotiated.

Conservative Leader Bennett said this made the vote a blank cheque, a derogatory term often hurled at his government's legislation.

The minister disagreed. It would not be a blank cheque because the sum of money was stipulated.

That made no difference, Bennett retorted. Parliament still did not know how the money was to be spent; it was blank cheque authority.

It was impossible to give details of the projects because the agreements were not signed, the minister repeated. When in opposition, Liberals criticised Conservative legislation as blank cheques because the spending power was unlimited, no sums were stipulated at all.

Price Advance Warranted

Minister Of Agriculture Answers Question Regarding Potato Crop

Ottawa.—Agriculture Minister Gardiner informed the House of Commons recent advances in potato prices were warranted by crop and marketing conditions, according to reliable information in his department.

The minister dealt with a series of questions asked by Hon. H. S. Stevens, Reconstruction party leader. Mr. Stevens had drawn attention to a press despatch which, he said, stated there was a shortage of potatoes in Canada. He wished to know if the government was aware this statement was unwarranted, and retail prices for potatoes had advanced as a result of it.

The government was not aware that the statement was unwarranted, the minister replied. "On the contrary reliable information shows that the crop and marketing position warranted a sharp price advance in potatoes. Commercial findings in Canada at April 1 totaled 4,615,152 tons against 246,873 tons in 1935."

Milk Condensing Plant

Red Deer, Alta.—Work will start soon on a milk condensery to be erected on Red Deer by the Central Alberta Dairy pool at an estimated cost of \$100,000. It was announced here. It was expected the plant would be ready for operation in July.

Arrange For Coronation

London.—The king presided at a meeting of his privy council at which it was believed the date for his coronation was discussed.

Between Ourselves

Mothers Day

SUNDAY next, May 10th, is Mothers Day, and what person in our lives is more worthy, more fitting to be honoured, by having a special day called after her than our Mothers.

To those who will be privileged to wear the pink emblem, treasure your Mothers, while they are still with you, honour them and care for them as long as they are spared to you, make her tasks a little lighter by helping all you can, by Love and Obedience.

Those who must wear the White emblem will recall the many cherished thoughts, the many comforts and balm Mother brought to us, when as children we sought her out with our little troubles, and how swiftly she brought solace to our little troubled minds and souls.

Exceptions have been taken to having a Mothers Day, on the grounds that it is only something instituted from a sentimental point of view. This is true in part, but it was not instituted so that on one day at least out of the three hundred and sixty five we would remember our Mothers, perish such a thought. It was set aside in Mother's honour, this one day in the year, to be hers as a mark of esteem just the same as other days are set aside to honour the memory of some great man or woman, or historical event. What better day could have been chosen for Mother than a Sunday. This day should bring home to us all, more and more, what we owe to our Mothers, for all we are and ought to be, Mothers Dear we owe to thee.

Mothers everywhere "WE SALUTE YOU"

As a final tribute to Mother we quote for her those wonderful lines from Kipling's "Mother O Mine"

"If I was hanged on the highest hill,
 I know whose prayers would follow me still
 Mother O Mine
 If I was drowned in the deepest sea
 I know whose love would come down to me,
 Mother O Mine.
 If I were damned of body and Soul
 I know whose tears would make me whole
 Mother O Mine."

We have been fortunate since taking over the Chronicle, to have been given the co-operation of several men of the District, in connection with special Columns, and this week we add two more which we trust will meet the approval of our readers, Glimpes through the Study Window, and School Fair Notes.

Those who are in arrears with their Subscriptions will assist greatly by getting them into better shape. Remember the subscriptions must carry cost of the Paper, Advertising, and Job Work, being used to pay Wages, Light, Insurance, Taxes etc. After all running expenses are paid, what is left will be the Publishers share.

LIGHTNING PROTECTION

Now that winter is really over and summer fast approaches with its ever present danger of severe electric storms, it behooves us to give very serious thought to lightning protection for our radio sets.

The radio lighting arrestor, although a very insignificant looking device, nevertheless plays a very important part in the protection of your radio and your home from that treacherous foe, lightning. For those who like to know "what makes the wheels go around" a brief description of this device might not be amiss. It consists of two terminals, one of which is connected to the aerial and the other to the ground. These two terminals are separated by a small gap or vacuum of the correct length to permit a discharge path for a static charge of 500 volts or more. During an electric storm these charges jump the gap in your lightning arrestor and are conducted straight to the ground, rather than following the lead-in wire into your radio with probable disastrous results to the delicate coils and condensers.

Now, like all other articles, lightning arrestors wear out and need replacement at regular intervals if certain protection is desired. Especially after a season of severe storms such as last summer, it would be advisable to replace the old arrestor, as in a great many cases they will be found to be badly carbonised and partially shunted. This condition not only gives you no protection from lightning but will also cause weakened reception from your radio.

No outdoor aerial is safe without a lightning arrestor, do not take chances with your radio, home or family... Just because in the past you have been lucky, do not tempt fate too far. Be Sure you are protected.

Madden Notes

From Our Own Correspondent

A lively crowd attended the first "Saturday Night" dance of the season, in Madden Hall, May 2nd.

Crossfield was well represented, also Airdrie. We extend a hearty invitation for you to be with us again May 16th.

The "Gloom Chasers" supplied all the latest dance hits.

"Six Rules for Life's Highway" Always drive on the right side of the road; its safer and more enjoyable than the wrong side.

Slow down and use caution when approaching a cross road; it may be a place to make a decision.

Look out for children, they are the world's coming citizens. Do something for their betterment.

Help the traffic officer whether he is the Minister, Sunday school teacher or Leader for any good cause in your community.

Always obey all warning signs. If you have to speed, do it where it won't kill anybody, and try and speed only on the road to righteousness.

When you have to make minor repairs get out of the way of the main traffic if possible. Otherwise you may have a longer stop than you have anticipated.

McLudy

BUTTERSCOTCH PIE

1 1-4 cups milk
 One cup brown sugar
 One-half cup flour
 One teaspoonful vanilla
 Two egg yolks
 Mix smooth and cook. Use egg whites for meringue.

CARROT PIE

One cup cooked carrots (mashed)
 One pint sweet milk
 One-half cup sugar
 One teaspoonful cinnamon
 Two eggs
 One-half teaspoonful ginger
 A little lemon extract
 Mix well and bake in one crust. It is much like pumpkin pie.

CHRONICLE

British Professor Visualizes Rapid Flights Across The Atlantic In Near Future

From London to New York by airplane in a few hours is not a new idea, but it received a fresh confirmation by G. T. R. Hill, Professor of Engineering at London University. In an address before the Royal Society of Arts, Professor Hill declared that we may be able to look in the reasonably near future for an airplane cruising at two hundred and seventy-five miles per hour, and capable of carrying four passengers across the Atlantic with eight hundred horsepower. The whole atmosphere, says the professor, can be divided into two zones, the troposphere, up to about thirty-five thousand feet, in which the air temperature falls with height, and the stratosphere, above thirty-five thousand feet, where the temperature is constant. Between these two zones, he explains, is the "tropopause," where the temperature pauses in its fall, and it will be via this level that the airman will hop the Atlantic in a few hours. Stranger things have come to pass in our time, but it is likely that the Queen Mary will have her day before the tropopause becomes the favorite route for ocean-crossing passengers.—The New Outlook, Toronto.

Older Indian Dies

Cree Indian In Alberta Claimed To Be 130 Years Old

A mighty buffalo hunter when the bison roamed the prairies in their countless thousands, "Pecus," Cree Indian who claimed to be 130 years old, has gone to the happy hunting grounds.

If his claim was true, Pecus probably was the oldest man in Canada. Friends testified to his great age, and his death certificate bears the conservative estimate—110 years.

Active until his final illness, he was brought from a farm home of relatives to hospital at Camrose, Alta., in a semi-conscious state and died soon after.

Half a century ago, Pecus—the name meaning "claw" or "point"—was known as an old man to the missionaries and pioneers of the prairies. For many he had acted as guide, including men famous in the old Hudson Bay fur trade.

Pioneer missionary, Father B. Belleville remembers him well.

"He was an old man when he began guiding me 50 years ago," said Father Belleville, in recounting the life of the Indian.

He had travelled out of old Fort Garry, now Winnipeg, in the adventurous fur trading days and went with the historic "voyageurs" as far west as the Rocky mountains, and northward as far as the Great Slave lake. He was born at Fort Pitt, near what is now known as Brouseau, Alta., on the North Saskatchewan river.

One son, Louis, who was born on the prairies, and a daughter, Mrs. Marie Rose Ladoux, of Vermilion, survive.

Canada Well Up

Stands Seventh In Volume Of World Trade During 1935

Canada took seventh place in volume of world trade last year, the League of Nations' monthly statistical bulletin revealed at Geneva.

Great Britain led with 14.2 per cent. The United States was second, followed by Germany, France, Switzerland, Japan, Canada and Belgium. The list also included the Netherlands, India, South Africa, Australia and Argentina in the order named.

The gold value of world commerce in February, 1936, was 8.4 per cent. higher than in February of the previous year, the bulletin stated.

Poultry Industry

It is estimated that there were 94,000 less egg-laying hens on farms in Canada in 1935 than in 1934 but 268,000 dozen more eggs were laid, and the total estimated value of eggs (\$37,743,000) shows an increase of \$3,309,000 over the revised valuation of 1934. The average value of eggs in 1935 is estimated at 17 cents per dozen against 15 cents per dozen in 1934.

Destroyers Join Fleet

The Admiralty announced that the new destroyers Grafton and Grenade had gone to Gibraltar to join the Mediterranean fleet. On the other hand the destroyers Rowena, Trustee and Torrid, which are to be sold this year, left the Mediterranean for home waters.

Books Not Always Read

Number Are Purchased Just To Keep On Shelves

Old-time publishers admit it is a mystery what sells a book; but it is obvious there are two classes, those who buy a book to read it, and those who buy to have it because it is much-talked-of. Uncut pages in well-stocked private libraries attest to the latter. A leading publisher relates that a standard work was printed to the extent of 10,000 sets before it was discovered that the plates for six pages of text matter had been left out. There was consternation until a sales manager of long experience suggested that nothing could be done about it, but set about putting the books on the market as if nothing had happened. The salesmen went out on their rounds—"the sales talks were spiced with one foot holding the door open"—and the books were sold, all 10,000 of them. And here's the odd result: There were only eighteen complaints, scarcely more than the average expected of any book. All of which is reminiscent of Elbert Hubbard once wrote and published a "best selling" which he entitled in gold-leaf letters, "An Essay on Silence". It was beautifully bound in limp leather—and the 200 pages between the covers were all blanks!—Toronto Globe.

Hard To Decide

How Much Noise Is Enough Problem Of English Magistrates

The anti-noise campaign at Wirral, Cheshire, England, has come to a temporary halt while the local magistrates and others concerned attempt to decide how much baggage playing is enough. Neighbors of one Allan obtained a summons against him, charging that his playing of the pipes constituted an "excessive, unreasonable and unnecessary noise" injurious to the health and capable of being mitigated."

The case has been twice adjourned by the magistrates in the hope that the parties to the contention might reach an agreement regarding the maximum number of hours each day that Allan might play the bagpipe in his home. No agreement has been reached, possibly because some of those who complained regard a single squall from the pipe as excusable. New York has many trouble-some problems in subduing the noises natural to a great city, but the bagpipe has not reared its ugly head.—New York Sun.

Develops New Flower

Superdaisy Nasturtium Shown At Botanical Gardens In St. Louis

George Pring, director of the Missouri Botanical Gardens at St. Louis, has been an exceptionally proud man the last few days, because of the nasturtium in his spring exhibit. This is no ordinary nasturtium, however. It's a "superdaisy" developed by two Philadelphians, David Burpee and William Eyster.

"This flower has 50 to 60 petals," said Pring. "And this one is quite fragrant while the common variety is not."

Outlook Is Improved

Conditions For Waterfowl Better This Year In Saskatchewan

Water conditions in central Saskatchewan, from the standpoint of waterfowl promoting potentialities, are the best for the past five years, as the situation now stands. The melting of heavy snow has filled many sloughs that have been dry for five years. It is expected many of them will hold enough water, if the spring is reasonably wet, to keep the young hatch of ducks alive. Thousands of young ducks died in the drought period owing to sloughs drying up before they were strong enough to trek to water. There have been no bad floods in the Saskatchewan area.

A New York physician points out that 60 per cent. of the cases of eye trouble are merely symptoms of something wrong elsewhere in the body.

SETS NEW ENGLISH RECORD

W. E. Eaton, of Salford Harriers, smiles into the camera after winning the Ten Miles Running Championship at the English Amateur Athletic Association meet at the White City Stadium, London. Eaton broke the existing record, covering the distance in 50 minutes 30 and 45 seconds.

Horses Shipped To States

American Buyers Purchase 300 Horses At Saskatchewan Point

More than 300 horses have been purchased by American buyers in the Weyburn, Sask., area during the past several weeks and shipped to Black River Falls, Wisconsin.

Generally speaking, there is a shortage of horses in the Weyburn area this spring. The American buyers have managed to purchase the above number of general purpose work horses for cash from the farmers of this area and ship them out of the country.

The horses were shipped from Weyburn in 17 freight cars, averaging 18 to a car. Still more are being bought for shipment to Wisconsin.

The prices paid for the horses by the American buyers have ranged from 15 to 20 per cent. higher than a year ago.

A Real Philosopher

Wanted Nothing More Than Home Life And Work

The Northampton shoemaker, James Lucey, who became widely known as the friend of Calvin Coolidge, was probably no more of a philosopher than the average man who comes to full maturity with a lot of observations and opinions corked up inside him. But he did say one thing that deserves to live. In his basement shop he worked at his trade; above, his family life went on. He was wont to say:

"Here I have my work; upstairs my girls and boys. What else could a man ask of life?"

What else, indeed? There are few men who have put so well the little all that marks the line between contentment and resignation.—New York Sun.

Jiffy Knit Is Easiest of the Easy

PATTERN 5530

This Jiffy-knit's Easiest of the Easy—but Why? Because it's made in double-quick time, and more, it's made all in one piece so that you've but to sew up the side seams, and Presto, Done! The dainty blouse is made in simple drop stitch—the skirt, just plain knitting. Choose Shetland wool. In pattern 5530 you will find complete instructions for making the jiffy-knit blouse and skirt shown in sizes 16-18 and 38-40; an illustration of them and of all stitches needed; material requirements. To obtain this pattern and 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg; Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Woman Makes Success Of Venture Near Niagara Falls, Ontario

The biggest commercial goat herd in Canada is owned by Mrs. T. N. Tyler, and located on the Beaverdam's Road, near Niagara Falls, Ont.

In the herd are snowy white Saanens from the Saanen valley in Switzerland, some of them with a record of 3,591 pounds of milk in a year; chocolate brown Toggenburgs, with white markings, also heavy milk producers, averaging about five quarts a day; a pie-bald or golden-colored Anglo-Nubians. They produce very rich milk but the quantity is less than the other breeds give. These goats are particularly affectionate. Their noses, otherwise their faces, have a most snooty Roman curve. Their ears, instead of being pricked, hang down in heavy fops, like a bloodhound's.

Mr. and Mrs. Tyler, English born but nearly 30 years in Canada, farmed in Saskatchewan before and after the war, during which Mr. Tyler served overseas. They went to British Columbia.

Nearly sixteen years ago Mrs. Tyler was ill there and run down. She could not get good milk. She could not afford a cow. So she bought a goat—for goats are common on the coast from California to British Columbia—paying forty dollars for the animal.

Two months, as the result of drinking goat's milk, the improvement in her condition, according to Mrs. Tyler, was marvellous. She bought another goat. What was a hobby with her in time became a business.

The goats have a daily diet of alfalfa hay, oats and bran, and salt. The latter is very essential to supply the minerals required by these animals. Goats which are tethered on town lots and destroy trees and other articles are poorly fed, according to Mrs. Tyler, and resort to this means to acquire the minerals they need.

Horns are conspicuous by their absence from this herd. With the exception of one or two goats there are no horns in the whole herd. When the kids are infants the budding horns are touched with caustic acid.

The Tylers are busy people managing their family of four young children, and the huge herd of goats, but they welcome visitors to the farm, and have much pride in exhibiting their stock.

Mrs. Tyler's children, the eldest eighteen years old, drink nothing but goat's milk. They actually do not like cow's milk. "And none of them," she said, "has ever had a sickness, not even the measles."

Victims Of The Depression

People Generally Have Carried On Bravely Under Hard Conditions

Hon. Norman Rogers, Minister of Labor, says: "The victims of the depression in Canada alone may be counted by the hundred thousand. We often think and speak of this problem in statistical terms, we are compelled to do so for purposes of comparison and analysis; but behind these figures of unemployment and relief there is, as each of us well knows, the harsh reality of human privation and frustration. Even when we deal with it objectively, as we are compelled to do, we must be conscious at all times of the extraordinary patience and fortitude of those whose lot it has been to go in company with fear and pain during a period which now exceeds the duration of the World War. We could ask no higher incentive for our labors here than the remembrance of the manner in which our people generally have endured the conditions which have prevailed during these troubled and trying years."

Recovered From Anger

In Los Angeles was probated the will of John Downing, who, after bequeathing his wife \$2,500, had strangled.

"Nov. 1, 1930. This will be null and void by I, John Davis Downing. "April 20, 1934. This will is O.K. I was mad Nov. 1, 1930."

Recieves Appointment

Dr. Clarence O. Swanson, head of the geology department at the Michigan Technology school, was appointed professor of mineralogy and petrography at University of British Columbia.

Twenty-one years in the Arctic regions behind him, Dr. H. L. Paddon has gone home to tell English his experiences. Dr. Paddon was one of Sir Wilfred Grenfell's medical missionaries in Labrador.

This period of thrill-packed adventure in one of the most isolated corners of the globe—always with his life in risk—seemed to be one long trek after another.

"I have travelled 25,000 miles by dog team, and my longest single journey has been 1,800 miles," he said. "There is always a possibility of getting lost in a blizzard, running out of food, stepping on thin ice or being snowed up for days."

"When I first went to Labrador," Dr. Paddon added, "I patrolled the coast in a 43-foot ketch which had auxiliary power. Often she ran aground or became wedged in the ice and held us up for weeks."

"Once I had to consider using either an axe or a carpenter's saw to amputate a man's leg. He was stepping into a boat when his gun exploded and shot him through the thigh. An operation had to be performed at once, so I used the saw and had an Eskimo halfbreed for anaesthetist. Between us we controlled the bleeding with bandages and the man recovered." It was one of Dr. Paddon's many life-or-death experiences.

Dealing with the far northern Canadian territory, Dr. Paddon said mining experts were convinced the great gold reef in northern Ontario ran out somewhere on the Labrador coast between the Belle Isle strait and Ungava bay. "It is very difficult prospecting country, but that gold should be found one day," he said.

Mammoth Dirigible

Plans For New Zeppelin Greater Than Germany's Giant Of

The Air Paul W. Litchfield, president of the Goodyear Zeppelin Corporation, announced that engineers for the concern had drawn plans for a dirigible greater in size than Germany's giant of the air, the new Hindenburg.

The ship, he said, would be the largest in history, 850 feet long and 145 feet in diameter. This length would exceed that of the Hindenburg by 75 feet, he added.

Three eastern cities are now under consideration as the American terminus for permanent airship service between this country and Europe, he said. He named these cities as Philadelphia, Alexandria, Va., and Richmond, Va.

Old Historical Note

Tells How Cows Were Hired Out In England Years Ago

Some while ago I called attention to a curious new development in farming economics in England. It becomes common for farmers who are short of capital to buy their milk cows on the instalment principle; and organizations for this sort of sale have been set up and flourish. From a country rectory in Cambridgeshire comes a quaint and interesting historical note on the hiring of cows. In the year 1600 a well-wisher to the church bequeathed a number of cows for the upkeep of the church. These cows were to be hired out at such and such rents but the testator made this thoughtful proviso, that "during the time the said cow went dry" the rent was to be nothing!—London Spectator.

Killing Time

People partly to this crime of killing time might be pardoned if they'll only kill their own; but they murder yours and mine—kill our moments as they shine, butcher minutes which are rightly ours alone. Which is why I say in rhyming that the men who kill our time should be banished to an island in the sea, where, among the leafy bow's, they can kill a string of hours and not have a chance to bother you and me.—Walt Mason.

Just For Safety

"But, Your Honor, I was not drunk." "Then explain why this officer found you climbing a lamp post." "Because, Judge, a couple of crocodiles had been following me around, and I thought I'd just climb the post and escape them."

Tourists spent \$28,140,000 in Austria in the 1935 season.

WORLD HAPPENINGS BRIEFLY TOLD

Squadrons of the British Royal Air Force are in future to have their individual crests, similar to those held by regiments of the army.

Sale of more of the ships of the Canadian government merchant marine is contemplated in negotiations at present proceeding. It was learned.

British Guiana's largest diamond of the year, a 12-carat stone found in Enachu, was sold a few hours after its arrival. It had been registered. O. D. Lieberman, diamond buyer, paid \$1,200 for it.

Effective treatment of radium poisoning, formerly one of the diseases listed as incurable by scientists, was reported to the National Academy of Sciences at Washington.

One Lutheran pastor was run out of a German city and another taken into custody for failure to support the reichstag election March 29, confessional synod officials have learned.

Known as the "safest borough in England" because there had not been a fatal motor accident since November 1934, Grantham has lost its record. An elderly woman was killed at a crossing recently.

Japanese and Soviet officials, it was officially stated, have agreed to the general principle of establishment of two joint commissions to deal with the frequent Russo-Japanese border troubles.

Much work in rehabilitation in drouth areas of Alberta will be done this year under the direction of the provincial department of agriculture, but with funds provided by the federal government, Hon. W. N. Chant said.

Scout John C. Ward, 13, of Grande Prairie, Alta., has been awarded the gilt cross medal by Lord Tweedsmuir, chief scout of Canada, for saving the life of a man who got in difficulty while swimming in the Peace River, and successfully applying artificial respiration.

Have New Theory

Believe Grand Canyon Of Arizona Was Formed By Meteor

A theory that the Grand Canyon of Arizona was formed when a giant meteor struck the earth was advanced before the southwest section of the Association for the Advancement of Science.

Disagreeing with the commonly accepted theory that the gorge was the result of erosion, Capt. J. Turley, Albuquerque, N.M., civil engineer, contended the canyon was created when a meteor struck the earth with great force 40 miles west of Flagstaff about 600 years ago.

The Final Word

In a London clothing factory an argument between two porters who had obviously disagreed over something, finished as follows:

"Garn! Yer don't know wot yer talking about."

"Oo don't?"

"You don't. Yer oughter 'ave yer brains looked at."

"Yus, and you oughter 'ave yer brains looked at, and if the bloke wot looks at 'em don't find nuffin wrong then 'e oughter 'ave 'is looked at."

The distance around the equator is said to have shrunk 1½ miles in the last 100 years.

Miniature Painter Able to Get Close-Up Of King Edward

Josef Hilpert, who recently painted the smallest miniature in the world—a portrait of Premier Hepburn—on a bloodstone, told the Toronto branch of the Canadian Women's Press Club how he recently "crashed the gates" to get a close-up of His Majesty King Edward VIII.

"I thought I'd like to paint him. But when I got there it wasn't so easy. I said I'd come 4,000 miles for the chance. But I was told there were thousands of artists who wanted to paint him," Mr. Hilpert explained. He discovered the British Industries Fair was scheduled to start on Thursday of that week. He secured a ticket as a buyer, to pass the director of the fair and police, found through which door and at what time His Majesty was due to arrive. He then got permission to stand in an exhibit and joined the Royal entourage as it passed. The King turned and said: "Do you belong to the Royal Family?"

"Oh, I'm a Canadian representative here," he managed to reply.

"Thank you," came the response, and Mr. Hilpert marched on. He came back to Canada with several miniatures.

Mr. Hilpert chose Mr. Hepburn as subject for the smallest miniature in the world because, he explained: "Everybody likes him or doesn't like him."

This artist, who speaks seven languages, was an officer in the Hungarian army, graduated in law and was mayor of the city in which he lived in his native Hungary. He knew only two words of English when he came to Canada, seven years ago. They were "business" and "yes." Last year he published his first book in English.

A Diverting Story

Professor Demonstrates To Class The Power Of Suggestion

From Fremont, Nebraska, comes one of the most diverting stories of the day. Professor Hickman, holding a bottle filled with fluid in front of his psychology class at Midland College, uncoiled it and asked the students to raise their hands as soon as they smelled chloroform. In two seconds the first hand had been raised. In forty seconds twenty-six out of a total of thirty students present declared they smelled chloroform. Then the professor closed his simple experiment with the equally simple statement: "This bottle contains water."—Montreal Star.

Cost Of Commissions

Auditing Firms Divide \$198,000 On Price Spreads Inquiry

Nine accounting and auditing firms divided \$198,000 in receipts for their services to the price spreads inquiry of 1934, according to a return tabled in the House of Commons. The highest amount paid to any one firm was \$104,277, and the lowest \$161.

Senior partners charged \$75 per day for their services, and the daily rates graduated down to \$10 for stenographers.

There are about 3,000 wood ties to a mile of railroad track.

Easy Crochet Makes Lovely Felt

PATTERN 5193

Here's Fun for you—and Beauty for your dinner or tea table—in a lacy pattern which you can crochet so easily of string. It won't take you any time at all to learn the "sample" square design, on which all the others are based, and to crochet a goodly number of squares. When you've enough, join them to make a beautiful table cloth, bedspread, dresser scarf or pillow cover. Then sit back and wait for compliments!

In pattern 5193 you will find complete instructions for making the square above, an illustration of it, of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 375 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

GRANDPARENTS IN COURT WITH STAR

Two of the most interested spectators to the legal battle waged in Los Angeles between his mother and aunt over the custody of Freddie Bartholomew are the grandparents of the English boy star, shown accompanying him into court. Their English country home was Freddie's residence until his aunt, Miss Bartholomew, brought him to the United States two years ago.

Using Different Colors

Great Britain Painting Submarines To Match The Sea

The British admiralty, after several years of experimenting, has decided to paint its submarines in different colors to "match" the seas where they serve.

The main purpose of the "protective coloring" is to make the submerged craft invisible to low flying aeroplanes.

For some time it was the theory of naval experts that gray-green would prove the best color, regardless of what sea a submarine might be cruising in. But the hues of the oceans vary to such an extent that new shades had to be added.

British submarines operating in the Atlantic ocean, for instance, will remain gray-green, but those stationed in the Mediterranean will be royal blue. Curiously, those in the Red Sea will be painted black.

A Wingless Airship

A wingless airship now being tested in France is propelled by two "windmill" blades which are mounted tandem over the pilot's head, one of which sustains the ship in flight, while the other supplies the forward motion.

Bids are being asked for construction of a sister ship to the new British liner Queen Mary.

Dances are being called balls once more in London.

Ambitious Air Adventure

United States Airman Plans For Non-Stop Trip Around The World

Clyde Pangborn, trans-Atlantic aviator, is tuning up two aeroplanes for ambitious air adventures—record distance and globe-girdling attempts which would possibly include refueling in mid-air at Edmonton.

He wants to break the world's distance record of 5,657 miles set by M. Rossi and P. Coder of France in 1933.

Then he wants to fly non-stop around the world, with two or possibly three refueling contacts in mid-air, a thing never before attempted.

Pangborn has accepted delivery of the aeroplane in which he hopes to make the round-the-world flight, he said, and has taken it up for several satisfactory tests.

"I'd like to start the distance flight the latter part of June," he said, "either from Dallas, where I have been dickering with exposition officials, or from Daytona Beach, Fla."

Moscow, about 6,000 miles from either Dallas or Daytona Beach, will be his objective.

The flight to Russia will serve a double purpose, he said. In addition to the hoped-for breaking of the distance record, Pangborn wants to make arrangements with the Russian government for refueling stations at Moscow and Chita, in Siberia, for the round-the-world flight, the date of which is indefinite.

For the globe circling, Pangborn may arrange for an auxiliary refueling station at Edmonton. The flight probably will start from New York.

Claims World Record

After remaining under water for 18 hours, Konstantinov, a Soviet diver, claims the world record for duration of time beneath the surface of the sea. He made the record, Moscow reports, while repairing the hull of a tugboat which had sunk in the Arctic Ocean.

SUNDAY SCHOOL LESSON

MAY 10

EFFECTUAL PRAYER

Golden text: God, be thou merciful to me a sinner. Luke 18:13.
Lesson: Luke 18.
Devotional reading: I. John 3:18-24.

Explanations And Comments

A Lesson on Perseverance in Prayer, Luke 18:1-8. Jesus gave his disciples the parable of the Unjust Judge and the Importunate Widow, for the purpose of teaching them ("to the end that") that they ought always to pray, and not to faint. He also told them a parable about the need of always praying and never losing heart, Matt. 26:41.
The widow in our parable importuned the judge in season and out of season, and for a long time he would not hear her claims. As Dr. S. Parks Cadman puts it, "She camped on his crooked trail, and like the man from Shropshire in 'Bleak House' insisted on being heard at any time and in every place." Finally the judge was moved to give her justice by his fear that her continual coming would wear him out, would "give me a black eye," as the Greek may be literally translated. It is primarily an athletic word belonging to the pugilistic arena. Jesus must have used a very strong corresponding Aramaic term to convey his absolute requirement of importunity in prayer. Moffatt's translation reads: "Though I have no reverence for God and no respect even for man, still, as this widow is bothering me, I will see justice done to her—not to have her forever coming and pestering me."

"Hear what the unrighteous judge saith," exclaimed Jesus at the conclusion of his parable. If such a wholly unprincipled man would yield to the importunity of a persevering woman, how much more will the just God be ready to hear and respond to persevering prayer!

Alberta Tar Sands

Million And A Half Dollar Program For Separation Plant

Preliminary work will commence immediately on a \$1,500,000 program to develop a tar sands separation plant and oil refinery at Fort McMurray, A. J. Smith, of Kansas City, Mo., vice-president and general manager, announced on his arrival at Edmonton on his way to the field. Operations on the initial plant will commence by September.

Equipment for a 250-ton separation plant is now being manufactured at Kingston, Ont., and will be shipped within six or eight weeks for installation at McMurray. Next fall and winter equipment for a 3,000-ton plant will be shipped to the field.

A Queer Coincidence

Draw At Charity Carnival Quite A Family Affair

Little six-year-old Phyllis Stephen stood at centre ice at a charity carnival in Calgary and pulled a stub from a box containing 1,800 tickets in a raffle for a blanket. The holder of that number was absent so she picked another from the box. The new number was called and a woman started coming down to get the prize. A. Stephen leaned over to a reporter and said:

"That's my daughter who pulled the ticket. That's my wife who won the raffle. And I donated the blanket."

Investigation proved he was correct.

Cars Replace Camels

King Ibn Saud and 700 armed men have gone from Central Arabia to visit the Sheikh of Kuwait, on the shores of the Persian Gulf. Two hundred cars were chartered for the journey. A few years ago a similar party would have used at least 1,000 camels.

Cowrie shells still are used as money in some isolated communities of the South Seas, India, and Africa. The shells are taken from shallow spots in the bed of the Indian ocean.

YOUR GARDEN

Weather, soil and location may be ideal but without good seed, specially selected to suit Canadian conditions, the garden is going to be a failure. There is no guarantee that a flower which has given wonderful results in Great Britain or the Southern States will do equally well in this country, and because of this the average gardener is well advised to secure his seed and nursery stock from a reliable Canadian source.

Many people believe that it is much more difficult to grow beautiful flowers than a few rows of common vegetables. But this is not so. In many respects it is easier to produce the flowers. Of course there are certain things like gorgeous roses, delicately shaded lilies, and tender, stately lilies which certainly will not survive on neglect. There are also a dozen or so annuals and a few perennials which require practically no skill. Take the little Alyssum for edging walks or borders. It comes in several sizes up to six or eight inches in height. It will grow almost anywhere and will bloom all season. If the dead flowers are sheared off two or three times with clippers or even a lawn mower, Portulaca is another which can be planted and forgotten. It likes a hot sunny location and does not want much moisture. Portulaca will bloom all summer. A little larger, is the Calceola or pot Marigold. It thrives in almost any position, though it should not be too shaded. After blinding heat more attention is needed. The ordinary dwarf French Marigold is another which should not be overlooked by the gardener who has little time to devote to his hobby and also the California Poppy, Cosmos and ornamental Sunflower. This selection will give plenty of bloom, a fair range of colour and height.

Vegetable gardens should be very productive affairs and from a fraction of an acre of ground, ten times the yield is expected as would result from a similar area under ordinary field conditions. Where space is limited it is possible to grow two crops of very early and late lettuce, radish and spinach, in between later maturing vegetables such as corn, tomatoes, parsnips and Swiss chard. By the use of these things are beginning to need full room, the first named group will be used and out of the way. For the sort of planting eight to fifteen inches between rows is sufficient, or a better rule would be to allow the regular distance between the rows of corn and tomatoes, for instance, then simply put the early stuff in between.

Operate Under Regulations

Six Provinces Producing Chickens From Hood-Tested Flocks

Six provinces are now operating under the hatchery regulations and producing chicks only from selected, blood-tested flocks, says an extension service news letter. No chicks may be imported into these provinces unless they are produced from the same grade of flocks. The provinces in question are Alberta, Saskatchewan, Manitoba, New Brunswick, Nova Scotia and Prince Edward Island.

Shanghai, China, recently had a Better Homes exhibition. 2149

FLEMING'S FOLLY

—BY—
LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their properties.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for payment of wages for work on the dam. Roper Kilgo and Jackpot Mell meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz has had several drinks. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that Link was trying to ruin him. Buzz, inflamed with liquor and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming she has been robbed of the \$800 they had obtained from the bank.

On their arrival home they were met by a couple of Link's workmen, who told Fleming that there was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery and promised them their money as soon as possible. The men reluctantly returned to work.

Fleming finds Roper and Jackpot Mell making trouble among his workmen, and orders them off his place at the point of his gun. Both Roper and Roper swear revenge. Mell telling Fleming to carry his gun with him, as Mell would shoot him the next time they met.

(Now Go On With The Story)

CHAPTER XIII.

Toward ten o'clock the following morning Link rode back to his ranch house after a visit to North Valley, where with Waco Byrne and his skeleton force of riders he had gone about cutting all able-bodied steers from his herd assembled there. The result was nearly four hundred head, all he could possibly spare without seriously crippling his prospects for the coming year, even considering the probable sale of alfalfa grown by irrigation, which would enable him to purchase new breeding stock.

As he neared the corral, pondering ranch affairs, he saw the ramrod figure of Ames Stephen waiting. Apprehension flashed through his brain, but he nodded coolly and rode closer. "What's on your mind this mornin', Sheriff?"

The other did not dismount, but sat masticating a fresh bite of tobacco. "Link, is there any way you can get out from under this here folly of yores?"

He was forced to grin even though the words had a corner ring. "Not unless I stay on this horse and ride till sunset."

"Hm. From what I hear you're goin' to lose everything."

The rancher looked up. "What do you mean, Ames?"

Stephen pursed his lips as if to whistle, but changed his mind. "Due for killin', too. That's bad. I heard about Mell markin' yuh, Link. He shook his head sadly. "I'm dead set against shootin', but it happens sometimes anyhow. Shouldn't have got his dander up. I—uh, Jackpot ain't never failed yet to kill a man he set his mind to."

There was a momentary silence. "What do you mean about losing everything?" the spread boss asked quietly.

"Nothin' in particular. Only I came past the Hamilton place and caught Helen lookin' like she ain't slept all night. Worry done it, I reckon. Worry from bills and havin' yuh marked for Boot Hill. All that from Fleming's Folly. Fleming's Folly from that crack-brained noodle of yores!"

"You really think I'm crack-brained, Sheriff?"

Stephen's cheeks grudgingly relaxed into what was for him a benevolent grin, though for anyone else it would have been merely a reflective smile. "Reckon yuh'll go busted. Everybody says so. Mell and Roper and Matt Benzon and

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches or the pains of rheumatism, neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the *fastest methods yet discovered* for the relief of headaches and all common pains . . . and safe and regular.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Seth Howland, and even yore own partner's brother, Link, yuh shouldn't have cooked up this here scheme. What'll yuh do after yuh go busted and take the Triple H along? And get yoreself killed? What about the gal?" he persisted.

Fleming dropped from his saddle, tossed reins over the mare's ears, and called himself a snake. "In that case, and if I don't become another county murder case, I'll maybe ride to your house in town, Ames, and ask for a hundred dollars. Then I'll marry Helen Hamilton and hit the trail."

The other's piercing gaze did not waver. "Yuh ain't a good risk around here. Gettin' out's the only condition I'll loan yuh money on. Howsom ever," Stephen observed, and spat with extreme accuracy at a distant turf of bunchgrass. "I kinda think yuh won't get Helen."

"No? Who will?"

"Roper."

Link smiled. "He did have the inside track for awhile, that's true. Don't think he has it any more, though."

"Shore he has. Got it again."

"What's that?"—startled.

"He's shore makin' a heady play, or I ain't never been 'lected sheriff. Abruptly he changed the subject, as was his wont. "Have yuh turned up anythin' about that holdup and the eight hundred?"

Link shook his head. "I'm depending on yuh, Ames."

"Yeah. He gathered his reins and readjusted himself in the worn homestead saddle. "I'm after the money now, but I don't know who he is, where he is, or if he is. All I got is a bunch about them leather cuffs Helen grabbed one of. I can always get yuh a marriage license in a hurry, Link. He added—and rode quickly out of earshot."

Fleming looked after, noting that Stephen headed for Silver Creek Dam. He realized that in his odd taciturn way, Ames had wished him well, expressed confidence in Link as a man but skepticism in him as a builder of the irrigation dam. Also that he had delivered a friendly warning in regard to Kilgo seeking

BACKACHE

When terrible, slow-dragging back pain, painful and swollen joints, or spell after spell of dizziness and headache makes you feel like this—look out for your kidneys! Inflamed, congested kidneys cannot properly filter your blood. Correct this condition before serious rheumatic troubles develop. Soothe and strengthen your kidneys with

GIN PILLS
FOR THE KIDNEYS

favor with Helen Hamilton, and that he had little notion yet who had held her up.

The rancher climbed to the top corral rail and sat smoking in rober reflection. To a man, Boone County believed and almost hoped, that his plans would end in ruin. Quer, how obstinate people could be in regard to improvement. Merely because irrigation was as yet something new and outside their limited experience, they fully expected his dam to fail!

He noticed a round-shouldered rider approaching, his carriage plainly that of one unused to the saddle. In some surprise Link recognized the hang-dog outline of Buzz Hamilton.

Helen's brother rode straight toward him and dismounted. "Hello, Link. Gettin' yore men over to the Triple H soon, ain't yuh? Our boys are waitin' with every pound of beef we can spare, and I understand Marty Bush promised to put us first in shipin' tallow to-day. They'll have to start for Junction to-day."

Puzzlement must have betrayed itself, for Buzz laughed somewhat self-consciously and climbed beside Link, holding his mount's reins over one wrist while he produced cigarette material.

"Feelin' a little cooled off since yesterday?" he asked.

"Sure. It was those other homies made me sore. Gyp had made trouble before. Buster fired him and I had to knock him down. Roper didn't hardly win my love there at the dam, and as far's Jackpot Mell is concerned—" His fingers strayed to the hard butt of his holstered gun.

"It looks like trouble next time we meet. They might be friends of yours, but they sure aren't friends of mine. How does it feel to be home?" he added, to change the subject.

Hamilton struck a match and inhaled smoke from his cigarette. He seemed to be marshalling the words of some proposal. Pondering what had transformed Buzz, it struck Link as pitiful, the man's position in the world. An ex-convict, he wore an indelible mark that only time and irreproachable behaviour could erase. He could not help but feel deep gratitude that he was not in Hamilton's boots, and that the Lord had not handicapped him with Buzz's weak chin, his unstable nature, his utter lack of will power.

"You're wondering why I came. First," Helen's brother added in some embarrassment, "I want to thank yuh for gettin' me paroled. Prison is—He shuddered at memories the word conjured up. "It's like hell, I declare."

Link put a hand on his knee. "Let's forget that. You and I always got along, the little while we knew each other before you—went away. I was glad to do what I could for Helen's sake. She's fond of yuh, Buzz?"

"And me yore—fond of her?" Fleming frowned slightly. "You might put it that way."

There was a short pause. "Trouble is, I'm in a bad position now yuh did get me free. I realize I didn't act very well yesterday, but maybe it was the shock of comin' home an' all that. Anyhow," he declared, "I want a fair sample of the way I'm goin' to be."

The Star Loop owner swung around. "I'm sure glad to hear you say that."

"Wal, it's so. I had all night to think things over, and I talked to Helen about everything. Finally decided to ask yuh a favor because she said, and I figured, yuh'll be shore to give me a hand up."

"Do anything I can, Buzz."

"Way I see it, I can't prove myself a man until I have some responsibility to do it with. A guy paroled from prison for a shooting scrape can't own anything in this state except through somebody else. What I need is a pardon, or wal, till my time's up. That's too long."

Fleming knew all this. "Don't think I could manage a pardon for awhile," he pointed out.

"Shore, I got to show I'm reliable. That's what I'm gettin' at. Link, you can imagine how I feel home on my own spread—or what's half mine, by rights—but I haven't a thing to say about it. Nothing to do except work like a common hand. No voice in what goes on. It doesn't set very good."

"I understand that, Buzz—sure."

"Sis would like to make me manager again. She told me so. But bein' I kind of acted up yesterday, she'd want to do just yet. The longer I sit around, the harder I'll be for me to quit gamblin' and drinkin'."

I got to stay away from town to do that. Whereas if she'll make me manager, give me power of attorney so I really am manager—why don't she want of me, Link?"

Hamilton said with eyes shining, with hope evident on his prematurely lined face.

Fleming's first impulse was to

grasp his hand and to declare warm support. But some inner voice stayed him. He recalled Sheriff Ames Stephen's visit and his veiled warning. Link frowned. "Who put you up to this, Buzz?"

"What's that? Who put me up—Say!" he exclaimed, his hurt look swiftly changing to defensive anger. "What the heck yuh mean? thought of it myself—me and Helen!"

"There was a moment's silence. 'Wish I could believe that.'"

Buzz's face charged with color. His eyes, Link noticed, avoided his own. "I knew yuh'd be like that," came bitterly. "I knew yuh wouldn't give me a chance. Not you, Fleming—yuh got me paroled so's yuh could keep me from gettin' my rights!"

He started to clamber from the corral fence but Link stopped him. "Hold on. Maybe I was too fast. Let's talk this over. Helen likes the idea, eh? What does Roper think of it?" he asked, and his gaze fastened more intently on the other's face.

"Why, it was Kilgo that—"

"Young Hamilton halted. Confusion was plain in his manner, in the self-accusing quiver of his chin. He tried to veer away from the break. "I haven't asked him yet. Why?"

He looked down at the ground. Buzz followed suit and they faced each other. "Yes, you have, Buzz. Kilgo thought this! He's got some scheme behind this! What kind of a scheme could he have?"

"To get the spread away from yuh, once Helen gives yuh power of attorney. I know darned well that's it!"

Hamilton underwent a swift change. His face greyed and his fingers worked spasmodically. "Damn yuh!" he cried in hot anger. "You're set on bustin' our ranch sky-high! I see through you—me and a lot more people. Makin' out yore crazy about my sis is just to get her help to finance yore old dam. Yuh got some plan to grab the Triple H. Anyhow, yuh'll try!"

"Hold on!" The Star Loop owner's tone was cold as ice. His jaw set with a snap and in Link's grey eyes was a steady warning glint. "Don't you claim I'm deceivin' Helen," he warned angrily. "Or I'll break you into kindlin'! Here I get yuh paroled for a favor to her, and you come home and start throwin' yourself to the dogs. Why don't you make a man of yourself instead of knucklin' to Kilgo and his crowd of trouble-makers? Why don't you?" he insisted, lowering his tanned face to stare into that of Buzz.

(To Be Continued)

Battle Of Wits

News Photographers Prevented From Taking Pictures At Wembley Match

Score one for Wembley stadium strategists as well as for the Arsenal. While the Gunners battled their way to a 1-0 victory over Sheffield United in the English cup final on the mammoth enclosure, stadium officials won a battle of wits fought in the air.

To the other party in what turned out to be an exciting diversion for a crowd of 88,000 soccer enthusiasts was a battery of news photographers employed by film companies seeking to outwit the Wembley directors by "shooting" the game from autogyros and other aeroplanes. The officials had decided to make their own film, and in their efforts to defeat the photographers, directed 20 powerful searchlights on the aircraft.

After unsuccessful negotiations over royalties, Wembley authorities banned all motion picture cameras. The companies' darkly tinted pictures would be available in the stores that night.

When the game started, four autogyros and 10 slow planes started a merry-go-round above the arena, but the searchlights put a decided crimp in their operations.

Haggis, believed to be a strictly Scottish culinary delicacy, had its origin in ancient Greece and was brought to England by the Romans.

Demand for electricity in Great Britain constantly increased during the depression.

Little Helps For This Week

Let them that suffer according to the will of God, commit the keeping of their souls to Him in well-doing, as unto a faithful Creator. 1 Peter 4:19.

On Thy compassion I repose In weakness and distress; I will not ask for greater ease, Lest I should love Thee less. It is a blessed thing for me To need Thy tenderness.

Look not at your pain or sorrow, however great they may be, but look from them and beyond them to the great Deliverer whose power is over them, and whose loving, wise, and tender spirit is able to do you good by them. The Lord will lead you in the right way, day by day, and keep your mind stayed on Him in whatever befalls you. The belief in His love and hope in His mercy, when you are at the lowest ebb, will keep your head above the billows.

The Age Of Power

Reported Invention Of Japanese Scientist Would Revolutionize

A young Japanese scientist, Hideyuki Kikuchi, 21, is said to have completed an invention which in some unrevealed manner generates ultra-short electro-magnetic waves of allegedly such great energy that they can be used in ways likely to revolutionize industry. The first application is to be on the smelting of ores, in which it reportedly does away with the present elaborate melting furnace and the hydrogenation of coal to produce oil. The inventor is going to obtain patents in eleven European and American countries. As the result of this invention Japan withdraw orders from Germany for electric furnaces.

The Genius Of Dickens

People Who Never Read His Books Know The Characters

Dickens was the sublime caricaturist whose Pecksniff and Micawber, Janos Chubbivell and Squeers and Uriah Heap are not creatures of flesh and blood like those of Thackeray and George Eliot. They are rather human virtues and follies embodied and walking about on two legs. They are quoted and symbolized, wherever the English language is spoken even by people who know Dickens as they know Shakespeare, only by hearsay. And it is one test of his greatness that he can return to him again and again and catch something of the spirit of that general acclaim with which his genius was recognized in Pickwick a century ago.—Boston Transcript.

Waiting For Instructions

"Son," wrote a busy father, "emulate Benjamin Franklin, who said: 'To learn the value of money, borrow some.'"

In due time the boy at college replied: "Dear Dad, I did as you suggested. Borrowed \$50 from my roommate. What do I do next?"

A winter feeding experiment with pigs at the Dominion Experimental Station at Scott, Saskatchewan, showed that the absence of Vitamin D in sunlight can be remedied by adding an ounce per pig of cod liver oil or of pichard oil to the ration.

Coleman Hot Plate Cooks with Air!

Handiest cooking appliance for new cottages, bachelors, etc. Burns 605-41-18 fuel. Makes its own gas from exhaust line. No fire! No gas! Economical! Operates on fuel oil or kerosene! 100% efficient! 100% safe! 100% reliable! 100% clean! 100% easy to use! 100% perfect! 100% Coleman! 100% Hot Plate!

PRICED AT LOW AS \$10.00. Write for literature to Coleman Bros., Inc., 1000 Broadway, New York, N.Y.

Apply Minard's freely. It washes out poison and cleanses. And you can use it quickly after its use.

District Echoes

Mr. H. A. Bannister was a business visitor in Calgary Tuesday.

Mr. and Mrs. J. A. McFadyen were Calgary visitors Wednesday.

Monday was Arbor Day, and was observed by the Bankers as a holiday.

A. J. Hunter has obtained a position on a grader on the Banff circuit.

The winners in the Chronicle purchase game were H. May and Miss M. Murdoch.

Real Estate and Gordon.

Mrs. G. Y. McLean was a business visitor in Calgary, Friday and Saturday of last week.

Happy McMillan is titivating up his new building with a picket fence, and a caragana hedge.

When remitting use Express Money Orders, sold for your convenience at the Chronicle Office.

Miss Fanny Gough is at present at her home in Castairs owing to her School being quarantined for Scarlet Fever.

The Village Council have arranged with Mayor Wood to have the hole facing the Service Garage filled up.

Stationery, Job Printing, Chronicle.

The many friends of Mrs. Fox Sr. will be glad to learn that she is now up, and feeling more like her usual self.

Considerable renovation is being done this week to the local house of the Midland Pacific Grain Co. in readiness for the Fall Season.

For Cabbage and Cauliflower Plants, Flowers and other bedding-out plants see W. C. Brown, Madlen. (214c)

Merchants, we are in a position to supply you with printed cards in connection with the Weekly Half Holiday.

Insurance and Gordon
Careful reading of the pages and the Advertisements will repay you. Many things are included in the Advertisements of our customers that are to your advantage.

Many of the folks in the Village and District took in Dr. Alexander's Lectures. Dr. Alexander has a pleasing delivery, and gives his listeners much food for thought.

Case, De Laval and Gordon

We received this week a letter addressed "Editor" Chronicle Weekly, West Calgary, Crossfield. The Village is growing when we have West Calgary as a suburb.

Gone, but not forgotten. Mrs. D. H. McFadyen finished her work at the Post Office last Thursday evening, and Miss Helen Willis took over the role of Assistant Post Mistress on Friday.

Case machinery and Gordon Agencies

Mr. J. A. Emery of Calgary, and old time Resident of Crossfield was taken to the General Hospital on Monday suffering from Varicose Ulcers. He underwent an operation Tuesday morning and is coming along as well as can be expected.

Teachers and Children should read carefully from time to time the new column to be found on the last page in connection with School Fair week. "Seedling" will present many ideas and talks in this column weekly.

Auto Insurance and T. Tredaway
Bicycle riding on the sidewalks is again becoming a popular pastime, and the younger people would be well advised to cease this dangerous practice. Some day an accident will occur for which some will say, "Gee, I wish I had not been cycling on the sidewalk." It is contrary to the Village Acts and they are made for the benefit of all concerned, not for a few, so children observe them like good citizens.

More Echoes

Fred Patchell directs your attention to his Ad. at the foot of this column.

Local Advertisers stand behind the goods they sell. Buy locally and boost Crossfield.

The Womens Guild will hold an Afternoon Tea and sale of Home Cooking and Aprons Saturday May 30th in the Armouries.

If you cannot obtain that Knitted Suit locally Ladies, why not try the Exclusive Knitwear of Calgary. See the Ad. on this page.

This weeks Ads carry many specials for the House Wife, and the Bannister Radio Service a serious thought for all Radio users.

We are informed that the total amount distributed in this District through the recent Pool Payment in connection with the 1930 Pool totalled \$11,944.78.

In the list of prize winners at the Calgary Spring Show the name of Tommy Stamp was omitted. Tommy captured a second prize for his exhibit in the Open Class for Steers and Heifers.

Card of Thanks

We desire at this time to thank the Mayor and councillors of the Village, friends, and any others who extended to us many kindnesses during the past few months.

Mr. and Mrs. A. Heywood

June 24th, 6:30 p.m.
June 27th, 2:30 p.m.

"HERE'S ONE, BOYS"

A young lady who had never seen a game of baseball, attended one with her escort.

"Isn't that pitcher grand?" she said. "He hits their bats no matter how they hold them!"

C.G.I.T.

The C.G.I.T. wish to announce that they have a very successful organization under the capable leadership of Mrs. R. M. McCool. Last week the editor suggested that a Girls' Guide Organization be formed with a capable leader at the head. We think that one good club of this kind for our girls is quite sufficient in a small town such as Crossfield. We are very anxious to increase our membership for the next session which opens in September.

(Two organizations, C.G.I.T. and a Girl Guide Association are very different in many respects, but the suggestion above is no doubt a good one, better a live organization than two mediocre ones. Ed.)

School Fair Jottings
By "Seedling"

Teachers who can do so are requested to try and train a class for entry in the Physical Training class at the coming Fair.

One school has asked already if they may enter, and as the class is in the Bulletin, we could do no other than say "yes", so let's see some others come along and make a little competition for them.

This class can be made into quite a feature with a little effort on the part of some of the teachers who have the success of the Fair at heart, for even on a wet day (of which we seem to get our share) it would be something that could be staged indoors while the exhibits were being judged.

How about it TEACHERS it's up to you.
